In some regions, animals have been replaced by tractors. Threshing of paddy by machine, Bangladesh. One or two people followed the man with the cradle and tied the wheat into bundles using the straw .

Quite often, the crop is left standing in the field long after the cobshavemat. When pedaled, the threshing drum rotates and rice can be threshed when panicles are applied against the threshing drum. The construction was often in a high place, to take advantage of soft and steady winds to facilitate the work of Threshing the Grain separating the grain from the chaff, once the threshing had been completed. Since harvesting unthreshed produce results in frequent stoppages for emptying the machine, this constitutes the main drawback to the progress of the prototype.

According to the type of machine used, and specially to their working width, from " <https://www.researchgate.net/publication/312111111>: Large amounts of time and energy were expended to get bread on the table:
