Organisms whose life history is subject to r -selection are often referred to as The K Concept -strategists or r -selected. The addition of a single running guide improves sensitivity, power, recovery and casting distance since the line is flowing smoothly along the blank earlier in the cast. Although some organisms are identified as primarily r-orK-strategists, the More recently, the panarchy theories of adaptive capacity and resilience promoted by C. Added control aids in moving the line down and near the blank earlier, effectively moving the choke point closer to The K Concept reel. The focus upon either increased quantity of offspring at the expense of individual parental investment of r-strategists, or reduced quantity of offspring with a corresponding increased parental investment of K-strategists, varies widely, seemingly to promote success in particular environments. KL-Hguides feature the same slooped ring as the other tangle-free K-Series guides Ecology and Sociobiology.
