Also known as Data Search, find material and property information from technical references. Therefore, these units are also called conductive dryers.

EllicottCity,MD;Email:IncludedIncludeoutofsubscriptionresults. As a unit operation, drying solid materials is one of the most common and important in the chemical process industries CPI since it is used in practically every plant and facility Heat Transfer II Essentials: v. 2 manufactures or handles solid materials, in the form of powders and granules. Spray dryers are the most widely used in chemical, dairy, agrochemical, ceramic and pharmaceutical industries. High-frequency radio waves with frequencies from to 30, MHz

are utilized in microwave drying 2, MHz is used in batch microwave processes.

Combined microwave-convective drying has been used for a range of applications. Higher the temperature of the drying air, the greater its vapor holding capacity.
